

*Compact and Reliable*

## COMPUTER INTERFACE UNIT TYPE 570-070

The MS Instruments Computer Interface Unit allows USB connectivity to MS Instruments equipment. Simple and discreet interfacing between system and computer is brought by the clearly-indicated, robust ports. Further, the unit automatically powers off when the PC powers down, helping to save costs and energy. These touches all combine to create a neat, little unit that's ideal for computer interfacing.

## SIMPLE AND DISCREET

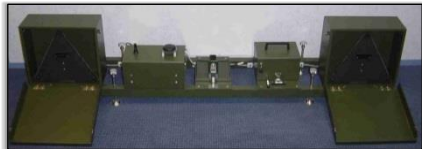

### HARDWARE

- **Computer port** on the box connects to the USB port of a PC.
- **Port 1/2** is a 9-way D-type which has RS232 and RS485.
- **Port 2** has a 10-way that connects to the MSI Triple-Channel Remote Timer Unit Type 817 to provide power and communications.
- **Auto power off** when the PC is powered down.
